Subject: [456] Lab 11 Demo Check Procedure

This is Lab 11 Demo check procedure on Wednesday, 4/19/2017.

1. An MSP board with radio will be used as a Host.

2. The Host will be assigned to an ID.

3. Each group will be given a used ID.

4. Demo Check 1

(4a) Upon request, each group sends via 456 protocol the distance measured by its own ultrasound sensor to the Host.
(4b) Host, upon receipt of the distance via 456 protocol, displays the distance on Serial Monitor.

5. Demo Check 2
(5a) Each group is ready to receive a message via 456 protocol from the Host
(5b) Host sends via 456 protocol certain message to a group at a time
(5c) Each group displays the received message on its Serial Monitor.
